

# HomeVu

## Customer Self-Care

### An IP Video Industry First: HomeVu, TV customer service assurance from the home

For the customers who want it - HomeVu is their TV service window.

This intuitive troubleshooting application enables viewers to use self-help diagnostic tools. Access is immediate, and does not require any assistance from the provider. Interactive tools allow the viewer to use the TV to report or query service issues, and access intuitive FAQs or help guides.

An empowered subscriber is only one of the many benefits enabled by xVu™.

### Operational Improvements

**Operating Expense:** Facilitated repair and auto-diagnostics will reduce help desk call volumes, eliminate unnecessary in-home service calls, and minimize mean time to repair, (MTTR).

**Installer Performance:** Improve service quality and reduce repeat home visits. End to end installation confirmation.

**Customer Experience (QoE):** Real time visibility into the health of the service empowers the customer to self-manage issues. HomeVu provides a sense of ownership, awareness and control over service quality.

**Issue Resolution:** Interactive FAQs and help guides to assist the customer to quickly resolve issues.

### Features

#### Empowering the viewer to:

1. Diagnose problems independently.
2. Resolve service issues real time without engaging the provider.
3. Report complex service issues quickly and easily.
4. Interact with the provider through the TV to monitor issue resolution status.
5. Access interactive FAQs and help guides.

#### In addition, the service provider can leverage:

1. Validation of home installation while on site.
2. TV-facilitated customer feedback.
3. Self-care efficiency metrics and insight.
